

# New Primals

## *Horse Girl Energy*

### About the band and the release

**New Primals** is a Noise Rock/Dance-Punk band from Minneapolis, MN, consisting of **Sam Frederick** on Guitar & Vocals, **Ali Terveen** on Bass, and **Lars Oslund** on Drums.

**New Primals'** sound is best described as a cacophony of piercing sounds, disjointed guitars, and atonal melodies, which are roped together by heavy, danceable rhythms. This sound is delivered in an appropriately punishing fashion at the bands notoriously frenzied, chaotic and confrontational live shows.

On stage, **New Primals** are a tornado. Their set, at times, feels like tightly controlled chaos, and other times, feels as though things are being held together by a thread, and that it might fall apart at any moment. As **Twin Cities Media** puts it: *"The band itself is like a bomb, the music they create is the explosion and the members are the shrapnel."*

Having formed in 2016, and after years of touring, refining their sound, scaring the shit out of people, and being all-around weirdos, **New Primals** are excited for the release of their debut LP, which is due out **March 20 2020** via **Learning Curve Records**.
